Women Leading Solutions on the Frontlines of Climate Change

And Solutions During Public Event

Paris, Washington DC, 28.04.2017, 16:34 Time

USPA NEWS - On April 29th, immediately following the People's Climate March for Jobs, Justice and Climate - diverse women leaders will unite to share their stories, struggles and solutions during "Women Leading Solutions on the Frontlines of Climate Change" D.C. The free, public event presented by the Women's Earth and Climate Action Network (WECAN) International - will feature women leaders from different countries speaking out against environmental and social injustice, drawing attention to root causes of the climate crisis, and presenting the diverse array of visions and strategies with which they are working to shape a healthy and equitable world.

On April 29th, immediately following the People's Climate March for Jobs, Justice and Climate - diverse women leaders will unite to share their stories, struggles and solutions during "Women Leading Solutions on the Frontlines of Climate Change" D.C. The free, public event presented by the Women's Earth and Climate Action Network (WECAN) International - will feature women leaders from different countries speaking out against environmental and social injustice, drawing attention to root causes of the climate crisis, and presenting the diverse array of visions and strategies with which they are working to shape a healthy and equitable world.

This event is organized with the conviction that real forward movement to address the climate crisis depends on the full and equal participation of women in all stages of decision making and implementation, and that real change will come from women mobilizing and taking action at the local, national, and international level.

As presenters will make clear - women have always been on the frontlines of climate impacts, now it is time for them to be at the forefront of all climate action. Included in the event will be discussions of resistance efforts from Standing Rock to the Amazon; Indigenous rights, environmental racism, and frontline communities; the intersection of gender and environment; and women's leadership and calls for action within a climate justice framework.
